EXPERIENCE

Security Analyst Intern

Technavors Security

Sept 2025 – Dec 2025

Pune (Remote)

- Conducted web app penetration tests across 10+ targets, uncovering 15+ critical vulnerabilities in auth, access control, and APIs.
- Authored pentest reports with CVSS scoring and mitigation plans, reducing client risk exposure by 40%.
- Validated 100% of developer patches via retesting and regression testing prior to each production release.

Backend Developer Intern

Genxploit Labs

Dec 2025 – Present

Amsterdam, Netherlands (Remote)

- Enforced fine-grained authorization using PostgreSQL RLS to prevent horizontal and vertical privilege escalation.
- Developed Restful API covering input validation, rate limiting, and error handling across 5+ microservices on each API.
- Tracked and triaged production defects on performance and stability, improving mean-time-to-resolution by 25%.

PROJECTS

OrbixaVPN – Secure VPN using V2Ray Protocol, | Xray, VLESS, WebSocket, TLS, Cloudflare

- Deployed Xray-core VLESS/TLS/WebSocket VPN across 3 cloud VPS nodes with encrypted tunneling; sub-50ms latency for 50+ users.
- Configured Cloudflare domain routing with TLS termination and WebSocket transport, sustaining 99.9% uptime.
- Automated VPS provisioning and Xray-core config via Bash scripts, cutting manual deployment time by 70%.

WatchDog – Windows Offensive Security Tool | Python, PowerShell, Bash

- Built a standalone .exe monitoring Windows Event Logs in real-time, detecting threats across 100+ event types.
- Integrated a C2 interface supporting remote system locking, screen capture, and webcam snapshots for forensics.
- Packaged with PyInstaller into a single binary; deployed on 5+ test environments with zero dependency conflicts.
